TECHNICAL SKILLS

Proficient: TS, JS, Python, React, Next.js, Node, AWS (S3, Lambda, RDS, SQS, SES, ECR), AI programming tools, Docker, Github Actions, HTML/CSS, Tailwind, SQL Databases, Git, Microservices, REST APIs Three.js.

Knowledgeable: C++, React Native, Expo, CI/CD, Storybook, GSAP, UI/UX, n8n, microcontrollers.

PROFESSIONAL EXPERIENCE

Premier Consulting Integration (PCI)

Software Engineer | Remote, NY | [website](#) | Sep 2022 - Present

- Full-stack web developer building features from design to production across frontend, backend and cloud infrastructure.
 - Built and maintained frontend interfaces using **React**, **Redux**, **Tailwind CSS** and custom components across many single-page applications.
 - Developed backend services using **Node.js & Express** also **Python & Django** Designing multiple secure REST APIs across various applications and microservices.
 - Architected and deployed a shared **UI component library** using React, Tailwind and Storybook, published the package to **Github packages** and used it across multiple React projects maintaining a cohesive feel across different products..
 - Integrated third-party financial services including **Plaid** and **Stripe** for payment and banking workflows.
 - Worked with **AWS** cloud infrastructure, maintained **Docker**-based **CI/CD** pipelines using **Github Actions**.
 - Practiced **Agile** development in a cross-functional team of Engineers where I led full-stack feature implementations end-to-end.
-

MILITARY EXPERIENCE

- **New York Army National Guard** | Wheeled Vehicle Mechanic (MOS 91B) | NY | Jul 2015 - Jul 2022
Served for 7 years in the NY Army National Guard while working full-time as a civilian, completed Basic Training and AIT at the U.S. Army Ordnance School, Fort Lee, VA (graduated with honors).
 - **New York Joint Task Force - COVID-19 Mission** | Operational Support | NY | Dec 2020 - Aug 2021
Provided operational support at the Jones Beach vaccination site and alternate care facility; managed patient routing logistics and ensured compliance across a high-volume, time-critical operation.
-

TECHNICAL PROJECTS

C.H.A.R.L.I. (Christian's Home Artificial Reasoning & Learning Intelligence)

Solo Developer | [github](#)

- A self-hosted AI personal assistant inspired by JARVIS from the MCU. Built to assist developing projects, doing research interfacing through natural language via **WhatsApp** messages or a self built home hub.
- Built on top of **OpenClaw AI** gateway; runs persistently on a local Mac Mini as a 24/7 self hosted service.
- Implements a **multi-agent architecture** with specialized sub-agents (research, coding, writing) using Claude and Gemini.
- Built a hub similar to an alexa using a RaspberryPi 5 to speak with the assistant in the house.

Portfolio Website

Solo Developer | [github](#) | [website](#)

Personal portfolio showcasing projects.

- Built with **React**, **Tailwind CSS** for styling and **Framer motion** for animations.
 - Backend built with **Sanity CMS** everything deployed on a custom domain.
-

EDUCATION

- **New Jersey Institute of Technology (NJIT)**
Bachelor of Science in Computer Science.
- **LaGuardia Community College (CUNY)**
Associate of Science in Computer Science

Newark, NJ
Expected date: Spring, 2029
Long Island City, NY
Spring, 2026
